903.454.0904

Do you have an idea or design and you're not sure the best way to make it a reality? Wondering about the best materials or methods? Need a sculptor or a team of sculptors to "flesh out" your idea? We are experts in composites, fiberglass, glass fiber reinforced concrete, urethanes and rubber. We offer laser scanning and CAD CAM fabrication. Whether you have questions about engineering or installation methods, or whether you just want to bounce an idea off of someone who knows the materials and possibilities, we are here for you. We have specifications, CAD files and material samples for your use. The initial consultation and the budget estimate are free and at no obligation. Think of us as your design, sculpture and material consultants.

Advantages: Why select Stromberg Museum, Aquarium and Zoo Services for your next project?

EXPERIENCE:

- Over 25 years of experience
- Engineers, sculptors, designers, architect, fabricators, installers and project managers on staff
- World leader in art and architectural castings and replication

CAPACITY:

- Over 100,000 square feet of manufacturing space and 14 acres to serve you. No job is too large
- Latest computerized laser scanning, CAD and CNC machining and enlargement
- Multiple cranes, hoists, welding, foundry, silicone molding
- 150 associates

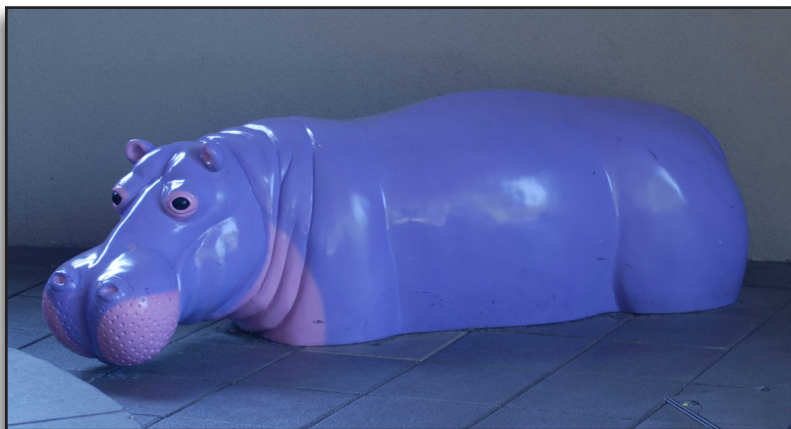

QUALITY:

- Recognized world wide as the quality leader in sculpture and museum reproductions
- Clients include The Smithsonian, NASA, National Park Service, Pentagon, National Museum of the American Indian, etc.
- Award winning projects around the world
- Design Assistance: Planning, Art and Technology Assistance

NEED A DINOSAUR?

A BUFFALO?

A UNIVERSE?

We are experts at creating sculptures for exciting and enlightening exhibits, signage and displays. From aquariums to museums, we can create sculptures that will excite and educate. What would that fossil you have look

like as a fully fleshed out dinosaur? Let us help you find out. Maybe a giant sea creature molded in fiberglass for the roof top? A bronze buffalo herd, a lion or a bronze dinosaur by the front entry? We can do that too.

At Stromberg our sculptors work with a combination of traditional techniques and computer driven, laser guided machines to create the most beautiful sculptures anywhere.

DINOSAURS

We produce terrifyingly interesting dinosaurs. Deadly velociraptors locked in combat, stampeding

triceratops or a t-rex in pursuit of a meal. Capture the imagination of your guests by letting them come face-to-face with these prehistoric giants. Showcasing the recent discoveries of paleontologists, our dinosaurs reflect the latest views on dinosaur anatomy, behavior and the evolutionary link between dinosaurs and birds.

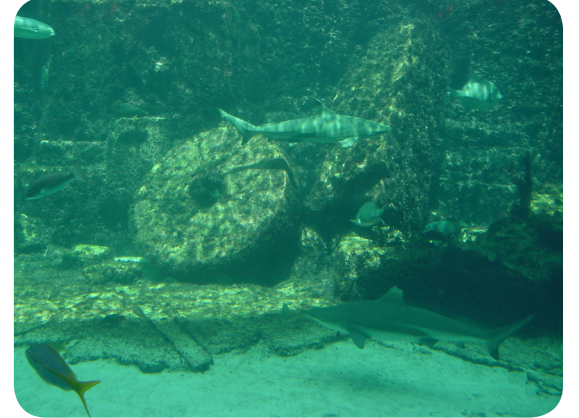

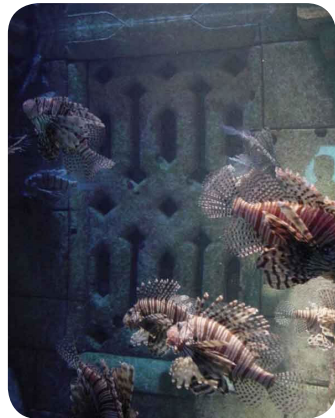

- Fleshed-out models complete with skin or feathers based on recent discoveries

- Life size dinosaur mounts and fossil bone recreations and sculptures
- Natural settings of dinosaurs locked in combat, sitting on nests or hunting food
- Dioramas
- Touchable casts of dinosaur bones and skin
- Material options include fiberglass, GFRC, bronze, polymer and more
