

750 E. PRATT

baltimore, maryland

Stromberg elements can be found as part of some of the most prestigious commercial buildings in the world, such as the office center found at 750 E. Pratt in Baltimore, Maryland.

Built in 2002, this 18-story, 338,688-square-foot office building is located next to the harbor and includes an attached parking garage, a health club, food service, and a central conference facility. It is home to some of the more prestigious law firms and energy companies in the Baltimore area. Stromberg manufactured a series of GFRC columns that support the unique overhead structure that crowns the roof of this building.
