

COMMERCE BANK

afton, missouri

GFRC

Though the design of the clock surround is simple, the effect is beautiful. The contrast between the GRFC and the surrounding materials only adds to the elegance of this fixture.

There are added considerations when creating a product to complement a multi-material addition to a building. The durability of pieces like this is of the utmost importance. That is why the New Commerce Bank chose Glass Fiber Reinforced Concrete made by Stromberg Architectural to complete their clock tower.
