

GABLES CLUB TOWER II CONDOS

coral gables, florida

GFRC • GFRP • CAST STONE

Stromberg GFRP is extremely durable. It withstood category 5 hurricane Floyd with no damage, while nearby structures were demolished.

Designed in the Mediterranean and South Floridian style, The Gables Condominiums incorporate coral cast stone details and accents in Glass Fiber Reinforced Concrete (GFRC) and Glass Fiber Reinforced Polymer (GFRP). Stromberg manufactured several hundred GFRC columns in a coral stone texture for the balconies and entry areas. Stromberg Architectural also created the Cast Stone coral trim along the balconies, walkways and pier.
