

# MIRAGE RESORT

las vegas, nevada

Visitors to the famous Mirage Resort in Las Vegas can now see the work of Stromberg Architectural at Siegfried and Roy Secret Gardens. The multi-million dollar expansion presents Siegfried and Roy's famous white tigers along with dolphins, white elephants and other exotic animals. Stromberg was commissioned to supply various elements including the entry arch which features sculpted tigers and bas relief dolphins.

“The concept was that of an ancient stone structure discovered in the jungle.”

-- said Lyndon Stromberg, owner of Stromberg Architectural

“The look helps to create the theme and feel of the attraction. Millions of people a year visit the Mirage. Siegfried and Roy specifically requested that we perform the work.” We pride ourselves on using the best materials. Many of our products can be customized for your project.

## STROMBERG
