

The Pan Asian Bistro in Englewood, Colorado is an Asian seafood lover's paradise. With a seafood signature platter piled high with tuna, salmon, calamari, scallops and shrimp at only \$24, the restaurant is more than reasonable for the quality of the food served.

The same can be said for Stromberg Architectural Products who supplied the custom tusked sculpture that frames the entrance to the building. Stromberg is an industry leader in the production of architectural elements and sculpture for a wide range of projects that span the globe.
