

E. BARRETT PRETTYMAN COURTHOUSE

washington, d.c.

GFRC

The Prettyman Courthouse in Washington, D.C. was opened in November of 1952. In March 1997, the U.S. Courthouse was renamed the E. Barrett Prettyman Courthouse in honor of the Judge on the U.S. Court of Appeals for the D.C. Circuit from 1945-1971 and as Chief Judge from 1958-1960. The 24-foot high monument in front of the courthouse was Judge Prettyman's idea.

With security concerns ever increasing, Stromberg supplied a series of 72 custom bollards for the grounds of the courthouse in 2005. The bollards provide a pedestrian-friendly barrier that prohibits vehicles from impacting the structure or impeding the walkways around the building.

These bollards are made from Stromberg's Glass Fiber Reinforced Concrete (GFRC). Stromberg has provided bollards to transportation centers and other security-sensitive sites for the most demanding customers in the world.
