

RICHARD E. BERRY

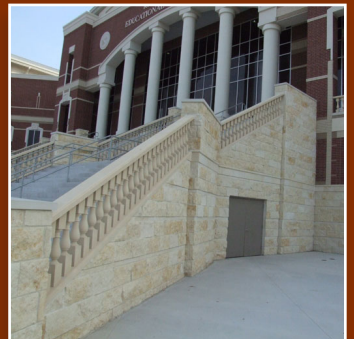

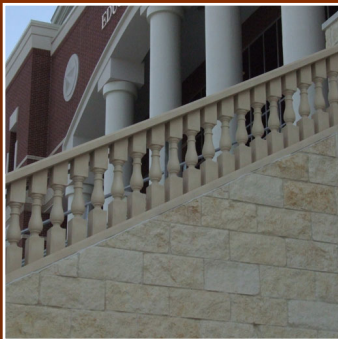

EDUCATIONAL SUPPORT CENTER

cypress, texas

Stromberg provided 350 linear feet of balustrade for the new Richard E. Berry Education Support Center and Stadium in Cypress, Texas. The center, known as the Berry Center for short, is a district-wide education center that houses an arena, stadium, theater, conference center and a staff development center. The Center's primary purpose is to assist schools in the district with adapting to ever increasing numbers. Retired superintendent Rick Berry was chosen as the namesake of the new education center because of his efforts to ease the transition of the Cypress-Fairbanks area from a small, rural school to a thriving suburban district.

Fast growth, such as that seen in Cypress, requires quick thinking and continuous adaptation, both of which are qualities prized at Stromberg Architectural. We are proud to offer the most durable, highest quality architectural stone products on the market.

We constantly adapt our products to the needs of our customers, providing new textures, thinner materials and a variety of products to help make your building project innovative and beautiful.
